Lexile Framework

The Lexile Framework for Reading is a scale for measuring a student's reading level.

This helps teachers place students in a reading program, match students to books for independent reading, and track each student's growth.

LEXILE MEASURES

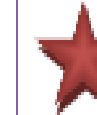

The Lexile measure is a good starting point in the book-selection process.

To help parents and students select books based on the student's current Lexile, a Find A Book website has been developed to help locate books that are at the correct reading level using a student's SRI scores.
